

### How do I add text to a Geopolitical File?

1. To add text to the .GPL file, go to **Edit** on the *Main Application Bar* and select **Geopolitical Editor** from the pull down menu.
2. Click the **Open** button on the *Power Bar* and using the *File Selection* window select your current \*.GPL file.
3. Click the **Text** button on the *Power Bar*. You will be presented with a **Edit Text** window.
4. Click the **Add** button.
5. Enter the text in the **Enter: Text** dialog box.
6. Using the combo boxes, dialog box and **Text Color** button, select the text attributes you require.
7. Click the left mouse button to indicate the start position for the text, stretch the rubber band, and Click the left mouse button again to indicate the end position for the text.
8. Click the **Accept** button on the **Edit Text** window.  
*Note: You must **Accept** the positioning of each text entry you want to add to the base map.*
9. When you have finished entering text Click the **Close** button on the **Edit Text** window.
10. To save the text you have added Click *File, Save As* and enter a new filename. If you wish to overwrite your current .GPL file then Click *Save*.

**Thank you for using TerraStation**
